**Уважаемые пользователи и дистрибуторы высоковольтных конденсаторов Murata:**

Вы, наверно, знаете, что компания **Murata** с середины **2018** г. прекратила производство дисковых керамических конденсаторов и конденсаторов «doorknob». Причина этого в том, что компания **Murata** решила сконцентрироваться только на высокодоходных сегментах рынка. В частности, на рынке автомобильных **MLCC**, которые и используют те же керамические диэлектрические материалы (**SrTiO<sub>2</sub>** и **BaTiO<sub>2</sub>**).

Предлагаемые нами конденсаторы являются хорошей альтернативой продукции **Vishay, Murata, AVX** и **TDK**. Они станут хорошим решением в области рентгеновской, компьютерной томографии, магнитно-резонансной томографии, оборудования для неразрушающего контроля и технического диагностирования, различных генераторов и даже военной промышленности.

1. **HVC** предлагает отличные решения с использованием керамического диэлектрика класса **N4700**, который используется в конденсаторах для применения в условиях, где требуется высокая устойчивость к напряжению, низкое рассеивание, высокая частота. **Murata** использует тип диэлектрика «**ZM**», а **Vishay** - «**T3M**», и они

аналогичны классу N4700.

2. Наши технические специалисты, обладающие значительными знаниями в области ЭКБ, обеспечат правильный выбор высоковольтных керамических конденсаторов.

3. HVC изготавливает продукцию под заказ в зависимости от площади печатной платы, диаметра изделия, расстояния между выводами и других деталей.

4. Использование конденсаторов HVC в качестве замены означает снижение стоимости, а также оперативные сроки поставки.

5. Конденсаторы HVC продаются через наших партнеров в Германии, Франции, Великобритании, США, Италии, России, Индии, Корее, Японии, Малайзии, Сингапуре. Они осуществляют доставку и хранение компонентов, предоставляют расщетки платежей и оказывают многие другие услуги.

6. HVC всегда рада помочь своим заказчикам в разработке новых проектов, что всегда означает требование к более высокому напряжению и более высоким частотам.
